Understanding our
Packaging Terms

Packaging that's Built for Growth

The Detpak Difference

Innovation

We understand how important differentiation is across every aspect of your business. That's why we have LaunchPad, our specialist, in-house packaging design agency and in-house R&D lab that drives innovation and growth exclusively for our customers; through bespoke design, materials science, cost engineering and sustainability. When you partner with Detpak, we help your brand stay differentiated in a busy market.

Sustainability

Sustainable packaging is undoubtedly the future, but we understand the pathway to that future is inconsistent, uncertain and anything but clear. That's where our sustainability experts come in, ensuring you have sustainable solutions fit for an evolving regulatory environment. It means sustainable choices today and the peace of mind you'll be ready for whatever tomorrow brings.

Supply Chain

The bigger your business gets, the bigger the disruption when something unexpected occurs. That's why we've deliberately built a global production network with owned manufacturing in seven countries, supply contingency across every product category and a dedicated global sourcing team. So, when you partner with Detpak, you can rest assured that packaging will never be your weakest link.

Subject Matter Expertise

When your brand grows, the problems that need solving tend to grow with it. That's why at Detpak we have subject matter experts to help provide innovative solutions for your business and guide you through packaging legislation. We'll take care of your packaging so you can focus on growing your brand.

Packaging for a better tomorrow

For over 40 years, sustainability has been a cornerstone of Detpak. Our 2025-2050 Sustainability Goals demonstrate our commitment to making a positive impact for our people, partners, and planet. Encompassing 15 targets across the pillars of Climate, Nature, Circularity, and Governance, these goals actively demonstrate our commitment to being an innovative global partner, creating packaging for a better tomorrow.

Scan to read more on our sustainability goals

A world of lining options

As single-use plastics legislation continues to evolve, Detpak has eliminated linings on a range of products where not required for functionality. We have shifted entire categories to more renewable coating options, and now offer a range of options including Aqueous, PBS and PLA. Detpak continues to be a leader in new and emerging lining technologies and encourages a holistic approach to required linings and their end-of-life disposal.

Designing for end-of-life

Our dedicated product designers undertake assessments against Sustainable Packaging Guidelines to ensure the materials used are designed for recovery where practical. We also prioritise recycled content wherever possible, with a large number of products containing more than 80% recycled materials. We also maintain the most highly recognised global standard for food safety and quality including ISO:9001 and BRCGS.

Community comes first

Detpak takes pride in being a responsible manufacturer and employer, not just an importer. As a family-owned company, Detpak chooses to positively impact and take care of our communities around the world, from our headquarters, to supporting initiatives in the countries where we operate, and beyond. We welcome the regular social accountability audits we are a part of for our global customers.

Sustainable Choices

Responsible sourcing

Detpak facilities globally are FSC® and PEFC Chain of Custody certified, and we also offer FSC® and PEFC certified products. This means products have documented traceability through the entire supply chain, from forest to end product. Our key suppliers are also audited, to provide confidence that all tree fibre materials are from responsibly managed sources, which contain no illegal, controversial or old-growth fibre.

QUALITY MANAGEMENT SYSTEMS

FOOD SAFETY MANAGEMENT SYSTEMS

AUSTRALASIAN BIOPLASTICS ASSOCIATION

ETHICAL CERTIFICATION

New Zealand, we've got you covered

New Zealand is taking action against single-use problematic plastics (SUPPs)

The complexity of packaging legislation is expected to continue as the New Zealand Ministry for the Environment, and industry bodies, progress reform to act on problematic plastics.

Future plastic phase-outs are currently on hold, but we're staying ahead of any future legislative changes in New Zealand, so you can feel confident we've got you covered.

Our extensive range of recyclable and compostable packaging solutions offer sustainable alternatives suitable for your location.

Visit detspak.com or contact our team to stay up to date with legislative changes and discover compliant product solutions for your region.

WE MAKE RESPONSIBLE CHOICES, TO MAKE YOUR CHOICE EASY

No Added PFAS

We have now transitioned all affected products to new materials, including no added PFAS grease-resistant papers and the Vanguard® by Eco-Products range of moulded fibre products.

Our commitment to sustainability is evident in pioneering packaging solutions for a better tomorrow. Our no added PFAS sugarcane food packaging range is a testament to this commitment.

The full Detspak range is now free of added PFAS, giving you peace of mind when selecting your foodservice packaging range.

What is PFAS?

PFAS (per- and poly-fluoroalkyl substances) are a group of chemicals used in a range of applications in common household items, to provide them with water, heat, sticking or grease resistance properties. PFAS are considered forever chemicals as they remain present in organisms and the environment indefinitely.

Scan to discover your compliant options from Detspak

Elevate Your Brand

At Detpak, our packaging experts are dedicated to turning packaging from a basic need into a strategic advantage for your business. Through LaunchPad and LaunchPad Lab, we deliver innovative packaging solutions tailored to your needs. Partnering with Detpak means you receive quality, customised packaging solutions designed to fuel your growth.

Choose your item from our wide range and follow the simple steps below to customise. Minimum order quantities vary by product, and size however, as a guide:

Hot Cups	From 50,000 per size
Bags	From 5,000 per size
Wraps	From 25,000 per size
Cartons/Trays	From 10,000 per size
Bowls	From 50,000 per size
Napkins	From 25,000 per size

Takeaway & Checkout Bags

Takeaway and Checkout Bags are constructed from strong materials for holding multiple items. They are free-standing and easy to load.

COMPOSTABLE

RECYCLABLE

A variety of checkout, food service and food delivery bags.

Heavyweight Takeaway Bags

Heavyweight Checkout Bags are constructed using a thicker grammage of paper, allowing for a stronger bag and higher weight capacities. They are free-standing and easy to load.

D Bags

Paper bags are an environmentally-conscious alternative to plastic bags, and can take heavy loads. The D Bag features a die-cut handle available with a plastic or board patch, perfect for takeaway orders.

Cartons & Trays

Endura Range

The Endura Range is made with sturdy, fluted board, making it ideal for foods such as nachos, wedges, chicken, salads and dumplings. All Endura Boxes feature vent holes to keep foods crispy.

Note: If using the Endura Range with greasy or wet foods, it is recommended to use a liner.

Poly-Lined Food Trays

Food Trays are sturdy and can be used for a variety of different foods. These trays are poly-lined to provide extra grease resistance.

Eco-Products® Sugarcane Clams

Vanguard from Eco-Products® Sugarcane Clams are sturdy and ideal for use with hot, cold and greasy foods. The sugarcane retains temperature but is breathable, keeping foods hot and crispy. These clams are fridge, freezer and microwave safe, and ovenable for up to 220°C for 20 minutes. We recommend oven testing to ensure suitability for your own operating conditions.

PE Food Pails

PE Food Pails are perfect for a variety of hot and cold foods. They're poly-lined, so they can handle saucy foods like noodles, pasta, and salads with dressing. Pails are free standing for quick and easy filling. Our wire handle option means you can carry the pail without a bag.

PE Pail-Paks™

Pail-Paks™ are poly-lined, creating an excellent moisture and grease barrier. They are ideal for meals like pasta, curries, noodles, rice, and salad. They have a low profile for easy loading and food access. They are pre-formed with a built-in lid.

Market Trays

Market Trays are made of heavyweight Kraft board, providing a sustainable packaging solution for fruit and vegetable produce. The trays are sturdy and can withstand over-wrapping application, as well as chilled storage.

62mm Lids

Fits 4oz Cups

80mm Lids

Fits 6/8/12oz Tall Cups

89mm Lids

Fits 8oz Squat, 12/16/20oz Cups

PE Ripple Refined™ Hot Cups

PE Ripple Refined™ Hot Cups combine flexible wrap material and cutting-edge cool touch technology that consistently keeps contents hotter for longer and provides sleek lines allowing for maximum branding opportunities.

PS Hot Cup Lids

PS Hot Cup Lids are made from quality polystyrene. The smooth lid provides space for baristas to record orders or customer names whilst the Click-Back Lids feature a convenient sipper hole that can be opened and resealed, ideal for drive-through hot drink purchases.

Clear PLA Cold Cups & Lids

Clear PLA Cold Cups are compostable and available across a range of sizes from 12-32oz, with flat or dome lids to suit. These cups are ideal for cold drinks, smoothies and slushies.

PE Paper Cold Cups & Lids

Featuring a lining on the inner and outer side to withstand condensation, these cups are the perfect sturdy and sustainable solution for serving your favourite slurpees, thickshakes, soft drinks and more.

The Dome Clear Recyclable Lid is ideal for slushies or chilled desserts with high toppings. These lids are made from crystal clear, quality PET. The Flat Lids feature a criss-cross opening for straws. These lids are 100% BPA free.

Understanding our Packaging Terms

What is 'Recyclable'?

A product or material is recyclable if it can be collected and re-manufactured into a new product. If a Detpak product is listed as recyclable, it means this product can be readily recycled via kerbside recycling streams once food residue has been removed.

What is 'Compostable'?

Our compostable packaging is made from organic materials that break down naturally in optimal conditions, leaving no toxic residue. Microorganisms, humidity, and heat is required to break packaging down effectively and when combined with green waste and food scraps, can create a nutrient dense compost to improve our soils.

Detpak's range of unlined paper and board products are readily compostable, and for all other items marked as 'compostable', various global certification standards exist, enabling consumers to understand how to responsibly dispose of their packaging. Certain packaging requires commercial composting facilities with the right amount of heat and moisture to break down, and other items may be compostable in a home compost environment. We recommend you check with your local council regarding acceptance of food soiled compostable packaging through green waste collection.

Commercial Compostability

AS 4736 - Australian Standard Certification
EN 13432 - European Certification

Home Compostability

AS 5810 - Australian Standard Certification

Australian Standard Certifications are issued by the Australasian Bioplastics Association (ABA), the peak body for the bioplastics industry in Australia and New Zealand

What is 'No Added PFAS'?

A product that has not had PFAS added. PFAS (per- and poly-fluoroalkyl substances) are a group of forever chemicals used to provide common products with water, heat, sticking, or grease resistance properties. The Detpak stock range is free of added PFAS.

How we measure our products

Measurements throughout our Product Catalogue are displayed in millimetres.

Bags & Wraps

L x W x G
Length x width x gusset (where applicable)

Bowls

L x W x H
Diameter x diameter x height

Cartons & Trays

L x W x H
Length x width x height

Our Materials

Paper and wood

Our paper and board is sourced only from responsible forestry, meaning no old growth forests are used. We use quality papers and board when making all our products for premium quality assurance.

Aqueous

Aqueous lining is an innovative water-based dispersion coating which significantly reduces synthetic polymer usage compared to bioplastic and plastic-lined options. Detpak's Aqueous Cups are certified Home Compostable to the Australian Standard AS 5810 and are free from harmful chemicals and intentionally added PFAS.

PBS (Polybutylene Succinate)

Polybutylene Succinate is a polymer which is made from two different components. One component is fossil fuel based, and the other component can be derived from renewable plant sources. This material creates a compostable and recyclable solution for cartons, without compromising on quality or performance.

PLA (Polylactic Acid)

Polylactic Acid is a bioplastic derived from cornstarch. It is a rapidly renewable resource and can be certified as industrially compostable. Our PLA options include CPLA (crystallised polylactic acid) or PLA-lined packaging.

Cellulose

Cellulose film is derived from plant cells and performs well in high-temperature environments. Cellulose film is compostable and provides crystal-clear viewing.

Sugarcane (Bagasse)

Sugarcane bagasse, a byproduct from sugarcane production, is an example of fibre-based packaging and is a rapidly renewable resource. Our sugarcane can be certified as either home or industrially compostable.

Plastic (including PE, PS, PP & PET)

Our plastic or plastic lined options include bags, cartons, trays, cups, lids and bowls. Plastic cups and cup and bowl lids are marked on the product with a Plastic Identification Code (PICs) between 1 and 7, which denotes the type of plastic used to make the product.

Weight Ratings

Detpak Carry and Checkout Bag weight ratings are provided as a guide only. Weight ratings are issued for general use in retail, takeaway and grocery environments. Additionally, it is recommended to test Detpak bags with your own product to ensure it is fit-for-purpose.
