

Our Process

From idea, to concept to solution - our team can help navigate your packaging design and innovation journey every step of the way.

1. BRINGING YOUR IDEA TO REALITY

Come to us with an idea in mind or a product to package and our team of packaging experts will bring your vision to reality.

2. DESIGN

Immerse yourself in the product design journey from brief, to concept, to delivery; facilitated by your dedicated Business Manager.

3. REVIEW + SIGN-OFF

Review your samples to enable meaningful enhancements, adjustments or the sign-off of your product.

4. QUOTE + ORDER

Work with us on the quoting and ordering process for your order.

5. ORDER IN PROCESS

Review a PDF proof of your final product, while our team work on making your vision a reality.

6. THE FINAL STEPS

We will provide you with regular manufacturing and dispatch updates and deliver your bespoke packaging as soon as it's ready.

Connect with us

Our Fast-Moving Consumer Goods (FMCG), grocery and industrial sector solutions are designed bespoke to cater to your needs.

Detpak

Choose Sustainable

SUSTAINABLE MATERIALS

At Detpak, as part of our commitment to sustainable sourcing, we only use ethically sourced raw materials in all our manufactured products. This includes the use of Detpak's innovative, alternative to traditional coating, RecycleMe™. We keep the use of inks and adhesives to a minimum and prioritise the use of water and soy based inks where possible.

RESPONSIBLE MANUFACTURING

At Detpak, we work closely with industry bodies and local and federal government, to bring you the best in sustainable packaging. We maintain the most highly recognised global standards for food safety and quality consistency, including ISO 9001, ISO 14001 and BRCS. Our products are manufactured in food grade packaging environments, so our customers can be assured of the highest quality standards.

FROM START TO FINISH

Detpak works with waste management and resource recovery stakeholders to develop increasingly sustainable options for product disposal. Detpak promotes resource efficient packaging design, the recovery and recycling of used packaging; and reducing the incidence and impact of litter.

CARING FOR COMMUNITY

Detpak takes pride in being a manufacturer, not simply an importer. We work to a strict Corporate Social Responsibility Policy, which cover fair wages and working conditions. Through charitable initiatives, Detpak chooses to positively impact local communities all around the world, from our headquarters in Adelaide, to the countries where we operate, by focusing on improving communities in a long term, sustainable way.

Our Solutions

Can End Bags & Snake Wrap

Pallet Liners

Cartons

Trays

Cups & Bowls

Ovenable board and paper for airlines, convenience stores etc

Capabilities: Hot melt glue, handles, embellishments, graphic design, lamination, different print types, specialised RecycleMe™ coating.

Packaged Goods

At Detpak, we have a team who specialise in packaging innovation and design for the Fast-Moving Consumer Goods (FMCG), grocery and industrial sectors.

We employ technical experts and invest in the latest machinery to deliver the highest level of customisation, innovation and functionality.

This includes Launchpad, Detpak's centre for concept creation and rapid prototyping that offers lightning fast turnaround time and maximum innovation.

This technical capability forms the foundation for Detpak to produce a high-quality product offering, a key factor for success in an industry where packaging must meet the requirements of our customers' own machinery on filling lines.

Environmental considerations are always an imperative, which is why we specialise paper and board substrates and source our raw materials from ethical and sustainable suppliers, innovating to minimise or eliminate the use of plastics.

This includes the incorporation of Detpak's innovative RecycleMe™ lining. An alternative to traditional coatings.
